

Set up your Breathify Air Pro

STEP 1

- Ensure all electrical parameters. The product works at 220V AC.

STEP 2

- Plug in your air purifier in the socket.

STEP 3

- Download the eWeLink App.

STEP 4

- Register your eWeLink account. If you already have one, just log in.
- Press the switch button on the back of the purifier for about 7 seconds until the green LED blinks fast.
- Tap '+' on the bottom of the app.
- Select the 'Quick Pairing' method.
- Input your WiFi name and password.
- The app will automatically search for the device and add it.
- If this fails, select 'Compatibility Mode' pairing method from the 'add device' page and follow the instructions on the app.
- Name your device.
- When the WiFi LED is on and steady, your device is online and ready to run. Switch it on/off from the app.
- To connect with a smart device like Alexa or Google Home, follow instructions on the respective smart device app to connect to an eWeLink Switch.
- For FAQs or troubleshooting, please refer to the app.
